

Corporate Classes

Congratulations on your decision to speak an additional language!

For nearly two decades, INSTITUTO PANAMERICANO has provided language instruction services to the local, national and international business, medical, industrial and educational communities. Clients receive private customized classes in over thirty languages, or can opt for group or on-site classes.

INSTITUTO PANAMERICANO's professional native speaking instructors use the INSTITUTO's own copyrighted courses to walk you through the beginning, intermediate and advanced levels of your target language using a direct, communicative and practical approach.

Unlike many other language instruction settings, our courses are not grammar based. You do not waste time with hours of drills, exercises and memorization. Instead you are exposed to real speakers in real settings as part of the practicum included in every course. As you make phone calls, conduct interviews, and participate in excursions to companies, businesses or institutions that conduct their operations in the target language, you will find yourself actually talking and interacting with native speakers as you continue to improve your proficiency.
